

Pad height compensator

Pad height compensator

MECHANICAL ACCESSORIES

 **Teca-Print**
 **Teca-Print**

Application:

In order to achieve your goals for demanding applications, Teca-Print offers a range of pad height compensators. This accessory is useful in applications of 2 or more colours, which print larger print images or in applications printing on various height surfaces. The pads can be adjusted to any vertical position, independently from the others and any point in the process with the use of the pad height compensators.

Models:

We offer various types of pad height compensators, which are dependent on the type of machine and it's printing force and pad stroke. Our sales team will assist you in determining the best choice for pad height compensators that your application requires.

Machine type	Number of colours					Stroke in mm	Pad height compensator
	2	3	4	5	6		
Serie E2	X	X	X	-	-	25	standard ^{1, *}
Serie E4	X	X	X	X	-	25	standard ^{1, *}
	X	X	X	-	-	30	with locking mechanism ²
Serie X2	X	X	X	X	X	25	standard ¹
	X	X	X	X	X	30	with locking mechanism ²
Serie X3	X	X	X	X	X	25	standard ¹
	X	X	X	X	X	30	with locking mechanism ²
Serie X5	X	X	X	X	X	40	with linear guides ³

- * additional mounting of valves required
- ¹ pneumatic cylinder
- ² pneumatic cylinder with additional locking mechanism for higher printing pressure
- ³ pneumatic cylinder with linear guides for higher precision
